Centralised Reports

Promote and demonstrate the value of the libraries across your department. Our professional services staff will work with you to develop centralised reports tailored to your specific requirements.

Benefits to you:

Save time with custom reports! There is no longer a need to individually access each Oliver v5 system across your department. **Centralised reports** allow you to connect and compile data by reading across all of the library systems within your department.

Flexibility. What you require, when you require it. Following consultation, our professional services staff will create and customise a report to your specific requirements.

Improved Statistics. Get access to improved statistics across your department and accurately identify areas of success and improvement.
