

Information and knowledge are your most powerful assets.

Streamlined management of information resources is critical to the performance of any organisation. The availability and accuracy of information can dramatically affect staff productivity and decision-making quality right across the enterprise.

Softlink's Liberty is the best resource to help you achieve this.

Why?

Because Liberty offers leading innovation at an affordable price.

Liberty offers leading innovation in the form of web and mobile app accessibility and advanced federated search. It is offered as a Cloud-based, Software as a Service (SaaS) solution with low up-front costs and affordable management fees.

Liberty

Because Softlink is an established and secure library management specialist.

Softlink is a world-leading developer of knowledge, content and library management solutions, supporting more than 10,000 libraries worldwide. We have employed industry professionals to develop our library solutions for over thirty years.

Because Liberty enables streamlined integration for enterprise-wide benefit.

Web API's enable ease of integration with other business systems such as MS Sharepoint. Liberty is the only solution to offer deep digital integration with third party eBooks.

Because Liberty is flexible to meet your organisations unique needs.

Offering an almost unlimited degree of customisation, Liberty offers an information and knowledge management platform that can evolve as your organisation does.

Because Softlink takes the risk out of migrating your information.

Softlink has a dedicated team of conversion specialists who have performed thousands of conversions from an extensive range of systems. Your migration is meticulously planned and carried out and incorporates a custom developed conversion report for your organisation.

How can Liberty help your organisation achieve better information performance and return on investment?

1 Utilise Cloud hosting

Reduce IT administration and infrastructure costs and have your system maintained and upgraded by the specialists who developed it.

2 Provide secure 24/7 enterprise-wide access

Liberty makes information available 24 hours a day with a secure web-based system, mobile apps, electronic document management, email, SMS and RSS features.

3 Improve financial management and accountability

Liberty offers comprehensive, yet easy-to-use budgeting, acquisitions and reporting facilities.

4 Rely on technology built on an industry standard platform

Microsoft SQL based to comply with mainstream technology. Liberty is a fast, powerful and stable software solution which will run on almost any platform.

5 Save time with automated information delivery and processes

Save staff time and improve accuracy with automated distribution of publications, workflows, reports and processing options.

6 Facilitate profitable decision-making

Liberty's flexible information discovery and delivery options ensure only the right information is filtered to decision-makers at the right time (and in the right way for them). This in turn can reduce information search requirements, enhance business agility and facilitate long-term growth strategies.

7 Empower your workforce and clients

Multilingual capabilities, web-based access and personalised self-service facilities means mobile and remote staff or clients can access information just as easily as walk-in clients via tablet devices, smartphone and laptop, or in offices across the city, the country or overseas.

“ I really liked the Liberty interface and its cataloguing features. There are a large number of user designed fields that we could use to support the library's previous idiosyncratic cataloguing, but it also allowed us to do Z39.50 cataloguing and supported our local authority files. ”

David Studham,
Librarian,
Melbourne Cricket Club

Key features of Liberty

- Advanced federated search
