

Connect Kids to Literacy

From library to PC, laptop, tablet and other digital devices. The revolutionary primary school ePlatform for the management, discovery and delivery of physical and digital learning resources.

Launch your school into digital resource delivery

Want to deliver electronic resources anywhere, anytime on digital devices? Scout is a cloud solution that supports 24/7 access to your resources for 21st century learning.

Get students hooked on learning

Scout captivates student imagination, building emotional attachments to learning and discovery.

Out-of-the-box professional LMS for primary schools

Scout is a professional knowledge, content and library management system (LMS) simplified. Based on Softlink's 30 years' LMS expertise, Scout provides essential, yet easy to use functionality for all user levels.

Link all your school learning resources

Scout integrates eBooks, electronic journals, databases, MIS, biometrics and other applications. Scout offers one platform for multiple resource management and applications.

Focus on managing learning resources not IT

Scout is a fully hosted solution reducing your reliance on IT departments. All updates and maintenance are provided.

Phone 01993 883 401 or visit www.softlink.co.uk

Manage

Manage physical, virtual and electronic resources through the one cloud platform.

Encourage student reading

For access to book reviews and reports on reading resource use.

Improve student achievement

Recent studies indicate digital technology helps students learn.

Unique Student engagement

Dynamic picture search environment, unique identities and graphics designed for primary school students, RSS feeds, book cover carousels and more. With their unique user environment students will want to log on again and again.

Be digital ready and launch into eLearning

Scout, the ePlatform to connect kids to learning resources and literacy

Integrate with other applications

MIS, biometrics, eBooks and other applications.

Reporting

For future resource planning and learning.

ePlatform to deliver resources on digital devices

Anywhere, anytime management, discovery and delivery of eResources on iPads, Android tablets, smartphones and other digital devices.
