

Liberty

Softlink's knowledge, content and library management system for health libraries and research departments

With the role of the health library evolving in today's complex healthcare environment, how information is discovered, delivered and managed by health professionals is becoming more important.

Liberty from Softlink is the best solution to help you achieve this.

Why Liberty for health libraries and research departments?

1 Secure information discovery

As a cloud based solution Liberty extends access to information and resources beyond the library walls. Health professionals working remotely can securely access information and library resources from their tablet device, smartphone or laptop from any location. Liberty can also be installed locally if security compliances apply.

2 Improved patient care

With Liberty, health professionals can access a range of information sources with one click. Having all relevant information available quickly, within one search, means more informed decisions can be made, improving patient care.

3 Flexibility to meet individual needs

Offering almost an unlimited degree of customisations and multi-site functionality, Liberty is the agile solution which evolves with the changing health sector.

4 Streamlined integration

Having the ability to integrate with a wide range of business systems, collections, journals and subscriptions through Liberty, the library becomes the hub of information and resource discovery, delivery and management.

5 Save time

Gain efficiencies, saving the health librarian time, through automated library workflows and reports. New resources, subscriptions and journals can be more easily distributed and loans or renewals managed more seamlessly.

6 Save money

IT administration and infrastructure costs are reduced with Liberty. As a cloud based solution no additional investment is required in hardware, deployment is low cost, and the system is maintained by the experts who developed it.

Key features of Liberty

- Federated Search allowing search of multiple information sources with one click
- Detailed statistical reports to support decision making
- Intuitive and seamless library workflows
- eContent integration with eBooks, eJournals, weblinks & subscriptions
- Library Link mobile app
- Inter library loans with other health libraries
- Easy to use self-service functionality

Liberty packages

Liberty Lite

A library solution for a single branch library for up to two management users.

Liberty Standard

A content and knowledge management solution for health organisations with multi-branch libraries or more than two management users.
