Managing Assets with Oliver v5

The cost of replacing lost or damaged school assets can be HUGE. The good news is you can use your Oliver v5 library management system to track and manage your school assets!

Benefits to your school:

Easily share your assets without losing them! Students and staff can search for, see availability, and book assets through Oliver v5. Proper asset booking ensures more care and accountability.

Expensive asset? Add a bit of extra security! Set rules around security, loaning and booking, or photograph and barcode your assets.

Track them down if you need to! You can track your asset by Make, Model and Serial Number and bookings by Building, Room and Location, including when the asset was last sighted at a location.

Get longer service from your assets through proper maintenance procedures! Note and monitor the servicing, repair and action dates of your assets to ensure minor damage doesn't lead to expensive loss.

Report on your assets! Built in reports allow you to regularly report on the status of your assets. You can even perform a stocktake on your assets with Oliver v5.

The Assets functionality is freely available with your Oliver v5 system.
