Engage younger students with Oliver v5's junior school interface

orbit

Orbit makes reading and research simpler and more engaging for junior school students.

With a dynamic picture search environment, interchangeable graphics options, RSS feeds, book cover carousels and more, Orbit will encourage students to love using their library.

- **Orbit** is simple, intuitive and designed specifically for junior and middle school students.

- **Orbit** caters for eBooks, carousels, book reviews, reading recommendations, important reminders and more.

- **Orbit** incorporates an extensive selection of avatars and backgrounds to appeal to different age groups.

- **Orbit** offers the latest generation technology and has been developed from the ground up for tablets and iPads.

- **Orbit** enables users to change colour schemes and customise their learning environment.

Softlink

softlinkint.com/edu

Orbit offers students a simple, engaging and customised reading and research sphere, a space to discover, manage and access any number of physical or digital learning resources.

Engage and customise

Choose from up to 22 different, pre-loaded backgrounds, 26 themes and 229 avatars. Library staff can upload additional backgrounds and avatars for students to use.

Manage

Orbit supports self-checkout, eBook integration, messages, loans and reservations and other functions to enable students to manage their library experience.

Discover

Simple, clear search facility that makes research fun and easy for students. 'Super' Search is also available, providing Federated Search capability.
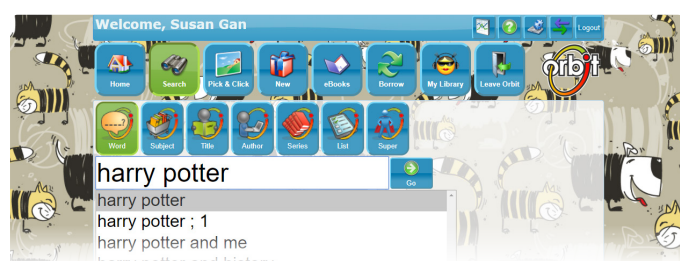

Access

Customisable home-page features include things to do, book carousels, slide shows and more, so students have access to the important information you want to share.
