Softlink | TASS Integration

Save time on library administration and borrower updates with Oliver v5's seamless integration with the TASS school management system.

With this **automated process**, student, and staff details such as photos, email addresses (including parent email addresses), year and class allocations can be added or updated as changes are made in the TASS general tab.

Additional benefits of the TASS integration:

- Improve data constancy in the library – TASS entries will be reflected in Oliver with no additional editing required by library or IT staff
- Student privacy is safeguarded by managing which data is shared with Oliver v5
- Secure API integration keeps student data safe end to end
- Oliver v5 hosted data is stored in a secure data centre – compliant with ISO27001 standard and ISO27018 for cloud privacy

Softlink are proud to be the **only library provider** recognised as a certified integration partner by TASS.
